

CS 4960 - Computer Science Seminar  
Oral Presentation Feedback Form  
Spring 2008

Evaluator \_\_\_\_\_

-----  
Speaker: \_\_\_\_\_

Note: Comments will be separated from the  
evaluator's name at the dashed line and  
given to the speaker:

Date: \_\_\_\_\_

1. List the main ideas from the talk as you understood it. Note any of the sections that seem unrelated to the rest or extraneous. Mark with a check mark the topics you found most interesting.

2. Comment on the speaker's style: Did s/he speak loudly and clearly enough? Was the use of visual aids appropriate? Did the speaker have any mannerisms that helped or hindered your understanding?

3. Jot down an overall impression of the talk. Did it capture your interest, for example? On the other hand, did it seem disjointed? Was it easy to understand?
