Instructions for Downloading Data for Homework #6

Data for this homework assignment is available for download at the class web site at:
http://www.cs.csustan.edu/~lamie/cs4000/main.htm

This data can be pasted directly into an Excel worksheet. Here is how to do it:
1. Right-click (not Left-click) on the web link titled "Data for HW #6"
2. Select "Save target as" from the menu that pops up
3. Save the file as hw6data.txt in your "A" drive.
4. Open file hw6data.txt after the file has finished downloading
5. Select (highlight) and copy the actual data (Ctrl C or Edit Copy)
6. Open a blank Excel worksheet if you have not already done so
7. Position your cursor on cell "A5" of the blank worksheet and paste this data into it (Ctrl V or Edit Paste)
8. Highlight that portion of the "A" column that has data (A5 to A16)
9. Click on the following menu items:
   Data
   Text to Columns
   check Delimited
   Next
   Check Comma Delimiter
   Next
   Finish

Your data should now be in the appropriate columns of your spreadsheet.

This is what the data looks like:
