CS 4100, Fall 2022
Assignment 1
August 22, 2022

Starting now and for the rest of the semester you are to write on a computer for 10 minutes a day (a minimum of four days a week). Start a file in the following required format:

```
<File name>
<Your Name>
<Date Created>
<Purpose>

=====================
<entry number>, <Date>          ←--- These are mandatory
=====================
your ten minutes of writing.............

=====================
<entry number>, <Date>
=====================
your ten minutes of writing.............

=====================
<entry number>, <Date>
=====================
your ten minutes of writing.............

and so on.
```

You can write anything you would like it this file. The writing needs to be in English. You should write for 10 minutes without stopping, do not go back and correct spelling or punctuation. I will check (skim through) it a couple of times during the semester (possibly with minimal notice) to make sure that you are doing it, but I will not be reading the contents.

The goal of this assignment is to develop a habit of writing, which will help to record interesting thoughts and clarify your thinking.

That said, I recommend that you use this to reflect on your courses.
